Say hello to Thread.

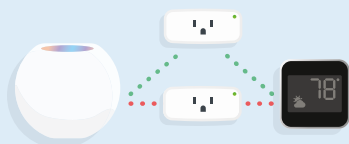

Thread makes your smart home more responsive and robust, and is one of the pillars of Matter, the smart home standard of the future. This is why Eve is embracing Thread: all current Eve devices that support Bluetooth now also support Thread.

Thread technology is specifically developed for smart home applications to improve connectivity between devices. The big difference with this technology is that Thread creates a mesh network. Within this, lights, thermostats, outlets, sensors, and more can also talk to each other free of the constraint of having to go through a central hub, such as a bridge. If a single device fails, the data packets are simply relayed to the next in the mesh.

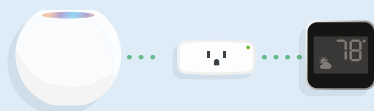

Eve offers the world's largest portfolio of Thread-enabled devices, all of them ready to be updated to Matter with a free firmware update. Updates introducing Matter support for the first Eve devices are already available – so if you purchase a Thread-enabled Eve device today, you're already prepared for Matter.

Thread Benefits

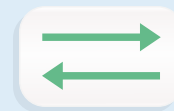

Robust, self-healing network

If one device in your Thread network fails, the next one fills in. Thread scales up easily and actually becomes more robust with every new device, unlike Wi-Fi and Bluetooth networks which become more unreliable and challenging to manage with a high number of devices connected.

Always in reach

If one of your devices is beyond the actual reach of your Thread Border Router, a mains-powered device placed somewhere in the middle that's always on, such as Eve Energy, can connect it to the Thread network.

Instant response

Thread was designed specifically to enable both mains-powered and battery-operated devices to be extremely responsive regardless of network size and density.

No bridge

Thread devices don't need a proprietary bridge to communicate with each other – they simply need a Thread Border Router.

Future-Proof (Matter)

Thread is a pillar of the new smart home standard Matter. All Thread-enabled Eve devices will receive free firmware updates over time – so if you purchase a Thread-enabled Eve device today, you're already prepared for Matter.

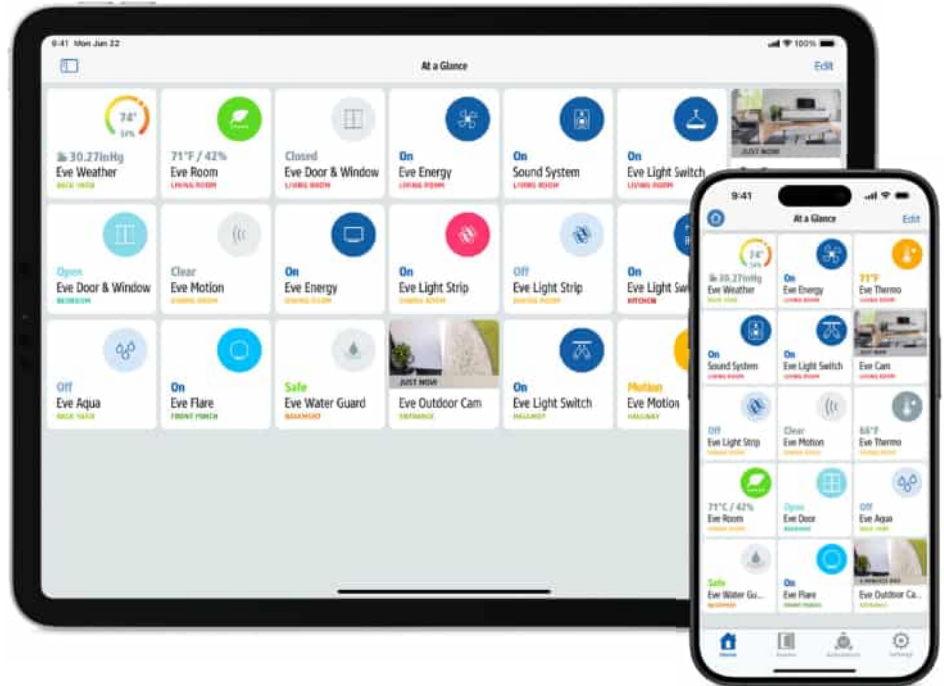

Longer battery life

Batteries last much longer thanks to Thread's extremely low power consumption.

The Eve app for iPhone and iPad is free and full-featured:

- Set up Eve devices in seconds
- Track weather, motion, power usage and more
- Set schedules to make your home work automatically
- Get new product features thanks to regular firmware updates

eve energy

Smart Plug and Power Meter

Switch your lights and appliances on and off using your voice or an app, and control them from afar. Eve Energy features future-proof technology with Matter, cutting-edge Thread networking, and no tracking whatsoever – for a universal and rock-solid smart home that honors your privacy.

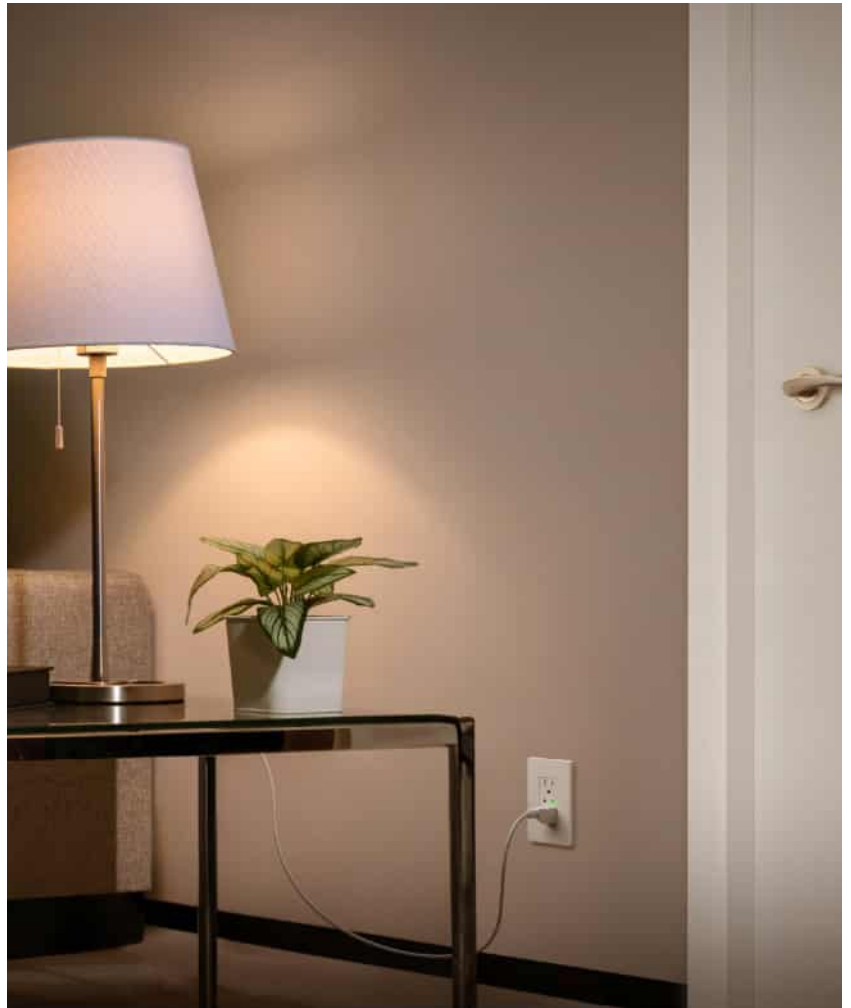

eve energy outlet ⚡

Smart Outlet & Power Meter

Switch your lights and appliances on and off using your voice or an app, and control them from afar. Eve Energy Outlet features cutting-edge technology with Matter, Thread, and no tracking whatsoever – for a universal and rock-solid smart home that honors your privacy.

eve energy strip ⚡

Connected Triple Outlet

With Eve Energy Strip, individually control three outlets with the app or Siri. Put devices on autopilot. And safeguard appliances with overcurrent, overvoltage, and surge protection. Crafted to perfection, Eve Energy Strip is the ultimate power distributor you won't want to conceal.

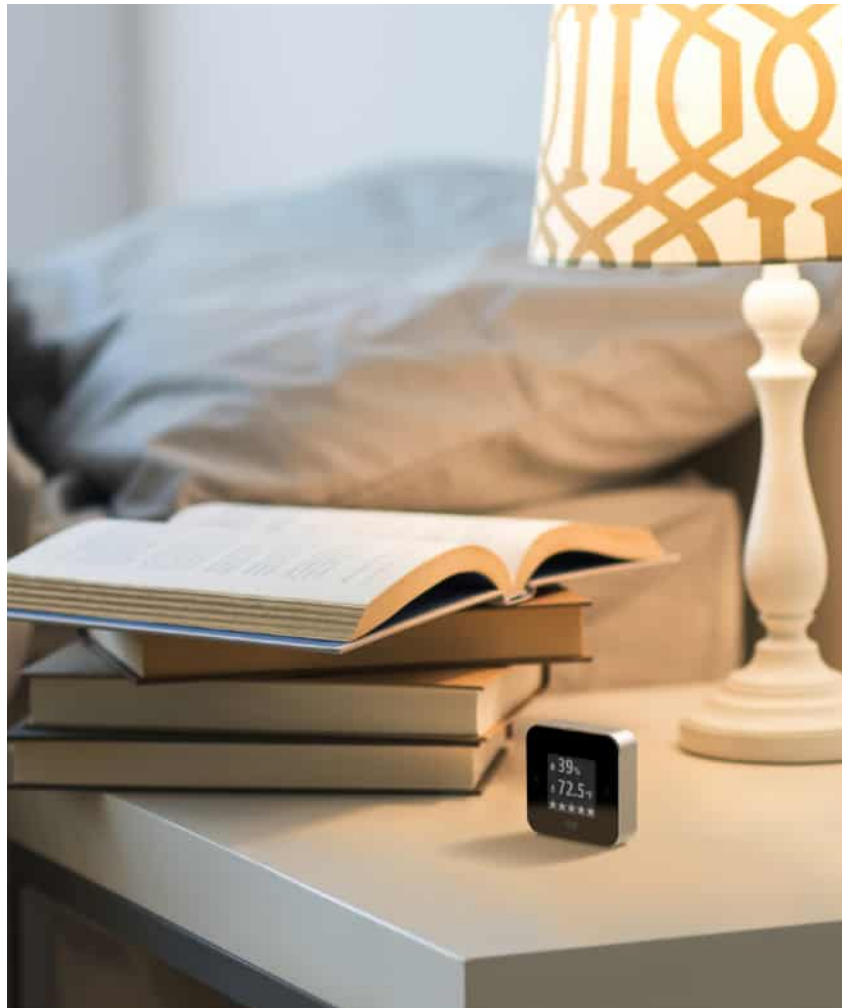

eve room

Indoor Air Quality Monitor

Eve Room is your key to healthy living. The award-winning indoor air sensor with Apple HomeKit technology measures volatile organic compound (VOC) concentration, temperature, and humidity levels in your home. View the readings on the integrated display or on your iPhone, and adopt healthy habits by following the history in the Eve app.

eve door & window

Wireless Contact Sensor

Know the status of your door or window. See the open/closed state at glance, create automations to control other connected devices throughout your home, and receive activity notifications. Eve Door & Window features future-proof technology with Matter, cutting-edge Thread networking, and no tracking whatsoever – for a universal and rock-solid smart home that honors your privacy.

eve motion

Wireless Motion Sensor

Let your presence bring your home to life. Control your lights and appliances via movement, and receive notifications when motion is detected. Eve Motion features future-proof technology with Matter, cutting-edge Thread networking, and no tracking whatsoever – for a universal and rock-solid smart home that honors your privacy. The only other thing you need is a matching hub of the platform(s) of your choice.

eve cam

Smart Indoor Camera

Keep a close eye on your home around the clock and protect the privacy of your personal space in the process. Receive rich notifications on your iPhone immediately when something is up in your home. Eve Cam is designed exclusively for Apple HomeKit Secure Video and was built from the ground up to protect your privacy.

eve outdoor cam

Secure Floodlight Camera

Keep a close eye on your home around the clock, and receive rich notifications on your iPhone when something is up. Eve Outdoor Cam packs advanced technology into a sleek metal enclosure and is designed exclusively for Apple HomeKit Secure Video, built from the ground up to keep your data secure and your private space safe.

eve water guard

Connected Water Leak Detector

Leave your home even with the washing machine running. Enjoy complete peace of mind knowing that no water's leaking in the cabinet beneath those water pipes. And keep a watchful eye on the basement, even though you don't go there that often. Eve Water Guard detects water leaks and alerts you the moment they occur – visually, audibly and via an app on your iPhone.

eve flare

Portable Smart LED Lamp

With Eve Flare, set the perfect ambience with a quick tap or Siri voice command. Enjoy 6 hours of untethered illumination, wireless charging, plus IP65 water resistance. Explore ready-made shades or fine tune your own. And indulge in the aura of any color you wish, anywhere you want.

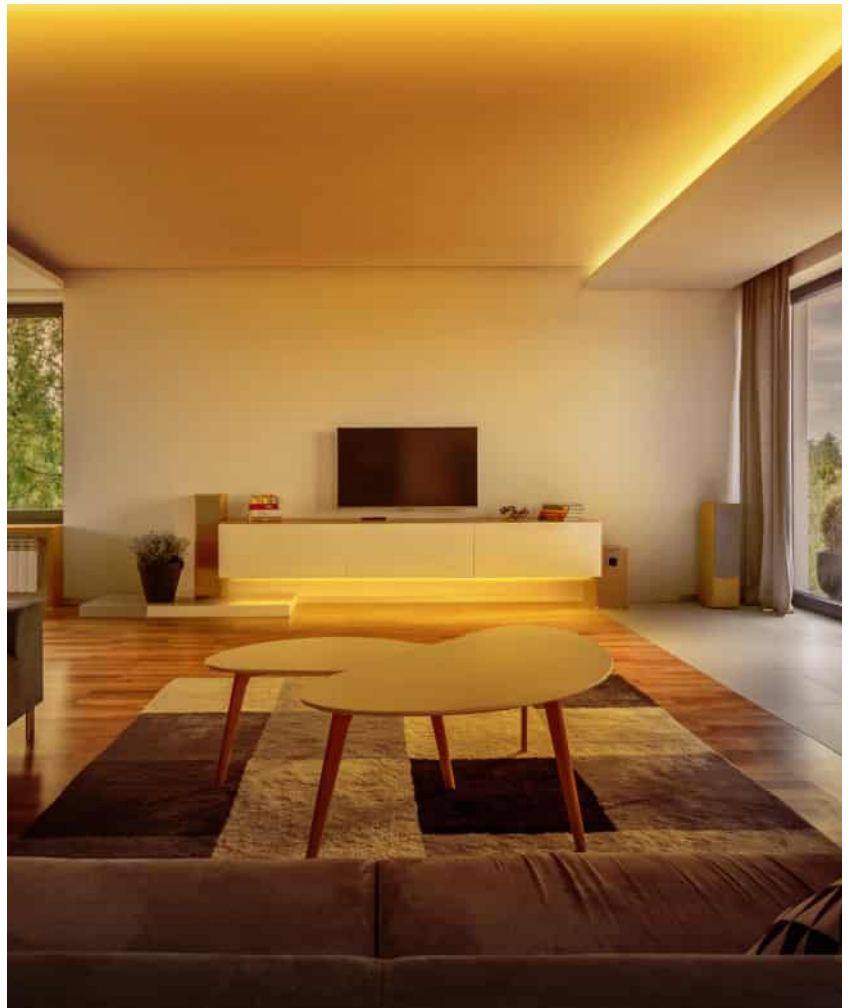

eve light strip

Smart LED Strip

Activate the ultra-bright 1800 lumens of light on Eve Light Strip for whole-room ambience, or dim to a subtle glow of understated elegance. Choose from any shade of white and millions of colors that you control via Siri or the app – or let HomeKit Adaptive Lighting adjust the color temperature automatically throughout the day.

eve light switch @

Connected Wall Switch

Enjoy the convenience of connected lighting with Eve Light Switch without replacing a single bulb in your home. Turn your lights on or off via app or Siri, and effortlessly set up schedules that put your lights on autopilot, turning them on and off independently of your iPhone or internet connection.

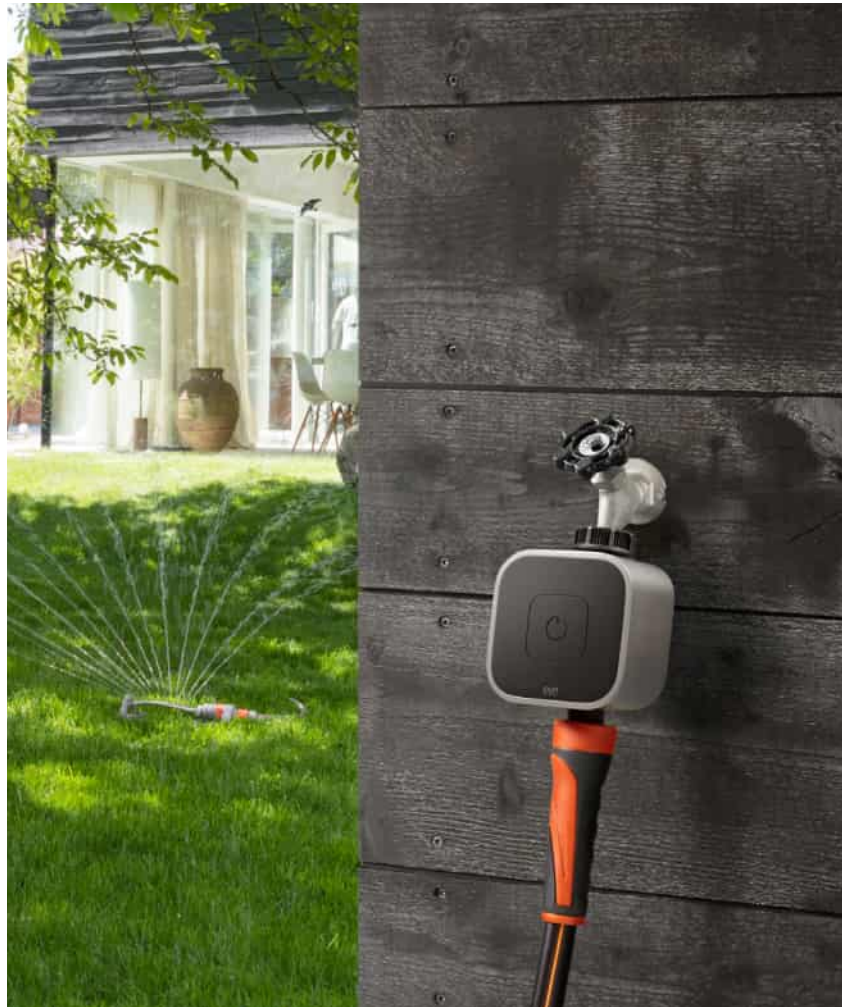

eve aqua

Smart Water Controller

With the Eve Aqua smart water controller, activate your irrigation system via your iPhone, Siri, or the onboard button. You can also set up schedules quickly and easily, and let Eve Aqua take care of watering your garden and patio plants – completely automatically without requiring an internet connection, a bridge, or a gateway.

eve weather

Connected Weather Station

With Eve Weather, track your current outdoor temperature, humidity and barometric pressure, and see the weather trend at a glance – on your iPhone or directly on the display. Review current and past climate data, empowering you with insights of the weather on your doorstep.

eve blinds collection

Made-to-Measure Smart Blinds

The Eve Blinds Collection is a curated collection of made to measure blinds featuring Eve MotionBlinds technology and, most notably, Eve's own Adaptive Shading function. Available through the Eve app for iOS, it lets roller blinds with Eve MotionBlinds technology automatically close according to the position of the sun.

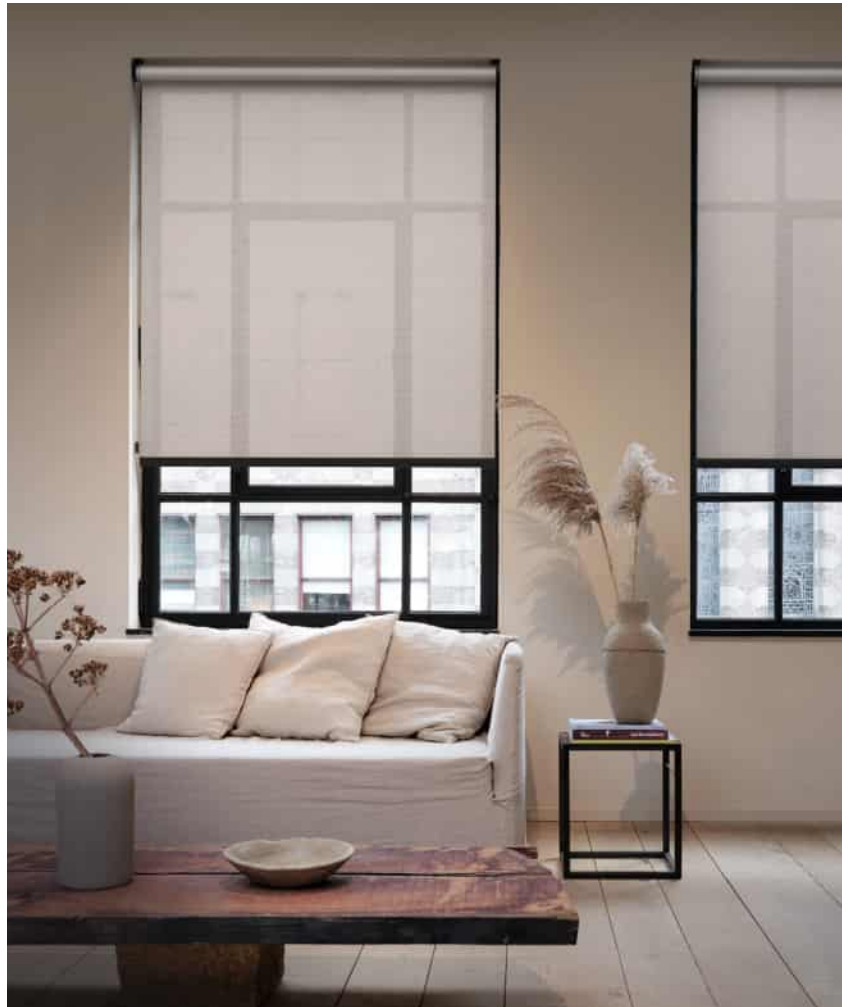

eve. | MOTIONBLINDS

Upgrade Kit for Roller Blinds

Upgrade your existing blinds with the Eve MotionBlinds Upgrade Kit and enjoy the convenience of smart shading with minimal cost and environmental impact. Control your blinds via app or Siri, or easily set schedules that automate your blinds to suit your daily routine.

eve play

Audio Streaming Interface

With Eve Play, stream music via AirPlay to existing amplifiers, active speakers or soundbars conveniently and in high fidelity. Encased in an award-winning design, the high-end audio adapter connects stereo systems to your home network for convenient music playback directly from your Apple devices. This way, your tried-and-tested Hi-Fi system becomes the new star of your multi-room setup.
